

Good evening. My name is Jonathan Tallman, managing member of 1st John 2:17 LLC.

I want to make a narrow procedural request for the record tonight.

Because this Park District meeting is occurring at the same time as the County Planning Commission hearing on related corridor and Heritage Trail matters, affected landowners have very limited ability to track, attend, and respond to multiple overlapping actions happening simultaneously.

Over the past several weeks, I have submitted multiple written emails, exhibits, and supporting documentation regarding the Parks Master Plan and the broader corridor impacts affecting my property.

However, the publicly posted online packet does not appear to include all of those materials.

Given the complexity of this corridor and the fact that these actions are advancing across multiple entities, it is essential that the Park District's administrative record remain complete, transparent, and accurate.

I respectfully request that all prior written submissions, attachments, and referenced materials I have provided be formally entered into the official record as exhibits, and that the District confirm what written documents are being relied upon for any vote or action tonight.

Thank you for ensuring the process remains fair, orderly, and complete for affected landowners.
